RE: Kennedy Industries Facility – 4925 Holtz Dr. Wixom, MI

To whom it may concern:

Kennedy Industries has encountered substantial growth during the last 10 years leading us to look at a long term solution with regards to our facility needs.

Kennedy Industries successfully specializes in water, waste water and industrial fluid handling equipment, field service & repair. Our Customers come to Kennedy because they know we will listen to their needs and provide them with a quality product and service even when timeframes are tight. All of these items must meet within a budget that is affordable proving true value to the customer.

We realized that we needed a general contractor that could provide us with same level service, quality and value, and also be aligned with our values and culture. After many months of interviewing potential general contractors, the choice became clear: **Brivar Construction Company**

Brivar worked with Kennedy personnel for 18 months prior to breaking ground. Their personnel were very detail oriented and worked with us on the smallest details to ensure that we felt like we were their only customer.

Kennedy personnel laid out the initial shop, machinery and front office in cad (Computer-aided design) and worked with Brivar to finalize the details that delivered us an absolutely impressive state of the art pump repair facility that made every employee very proud to be a part of something this special.

It was not without a challenge from Mother Nature. Weekly down pours threatened to delay the project and created enormous challenges to Brivar. Despite the best efforts of Mother Nature Brivar met the project delivery dead line with weeks to spare.

The team of suppliers and subcontractors that they assembled were the very best as well. Everything from the Varco Pruden, pre-engineered metal building to the smallest landscaping shrub was handled by Brivar Construction in a timely and professional manner always keeping cost down, quality high, and proving us with value for our money.

KENNEDY INDUSTRIES, INC.

In closing, Kennedy Industries personnel is very happy with the finished product and are proud to call this our home. We represent many of the finest companies around the world and every time someone visits our building they are amazed and can't say enough about the quality throughout the facility.

Thank you Brivar Team for a job well done,
KENNEDY INDUSTRIES, INC.
