

Brivar Construction Referral

So, we were in the market for constructing a new facility and a good friend of ours in the real estate business recommended Brivar Construction in Brighton, MI. We soon then after set up an appointment to meet and initial meeting to discuss the project. Through our due diligence of research and comparing bids on our project, we were glad and extremely comfortable with selecting Brivar as our general contractor for our 100,000-sq. ft. plus project.

With that said, I can honestly say that, from the very beginning to where we are today, that Brivar has been very competitive with their pricing, fair and honest with their solutions. Their entire team works for "you the client" and does it with an extreme amount of kindness and passion! Every one of the staff has an over the top, amount of dedication to ensure that your project can go as efficient and smooth as possible! The entire team at Brivar works to make "you the client" happy and will do it with a smile every day!

I will honestly say that I would refer them to anyone in the industry looking to take on a commercial build project and if we were to start another project tomorrow, they would be our first call!! -- (A forever customer – Novi, MI)
