

**PROMESS**

**INCORPORATED**

Sensing Systems  
for Manufacturing

**To: Whom it may concern**  
**Subject: Letter of Recommendation, Brivar Construction Company**  
**Reference: 2012 Construction Project**

**Brivar Construction Company (BCC) was selected from a five company bidding process. BCC was not selected as the low bidder, but as builder of choice due to depth of knowledge, experience, creativity and passion to perform as promised, on time.**

**Not foreseen in our project was re-zoning requirement, new regulations, new legislation, undermanned Township, County, State permitting departments and hookup fees that added to cost and time. Brivar embraced, as a matter of uncontrolled fact, stood by their customer and overcame each situation, negotiating in our behalf, saving the project thousands of dollars and keeping us on schedule.**

**We were assigned a full time site manager, throughout the construction project, who was backed up by a team of veteran construction support people. The construction process, selection of trades, in concert with the Architectural firm was done masterfully. We were kept fully informed of changes, trade issues, better way of construction and a host of other issues that happen on the fly. Due to the high level of communication we were able to head off costly mistakes, that otherwise would create domino effect, with time delays.**

**Done and run is the greatest fear of any major project. BCC support staff became the strongest when the project was completed. We have connected the day to day operational people to BCC, and any and all issues have been addressed to our complete satisfaction.**

**We only write these letters of recommendations to the upper five percent who deserve them. Brivar Construction Company certainly falls into that group. Please feel free to contact me if you have any questions related to Character and or accomplishment to our project activity.**

Sincerely,

Larry E. Stockline
